Letter of Recommendation

Date: October 15, 2026

To Whom It May Concern,

I am pleased to recommend Rasoul Abouassaf, who worked with Tanafos, a football app dedicated to making it easier for players to discover and organize football games.

Rasoul worked with Tanafos as a **Senior Software Engineer on a part-time contractual basis from January 2026 to March 2026**. During our collaboration, he demonstrated a high level of professionalism, seriousness, and rigor in his work. He played an important role in developing the first version of our admin panel for our partner football fields.

This initial version was put to practical use by Asatheer Football Academy, the first football field we signed as a partner, making his contribution particularly valuable to Tanafos. His work helped us move from an early-stage product to a functional solution that could be used in a real operational environment.

Throughout the collaboration, Rasoul approached his responsibilities with diligence, attention to detail, and a strong sense of commitment. We appreciated his reliability and the care he brought to his work, especially during a crucial stage in the development of our product.

I am happy to recommend Rasoul to any team or organization looking for a serious, rigorous, and dependable software engineering professional. I believe he would bring the same level of technical commitment, professionalism, and reliability to future projects.

Please do not hesitate to contact me should you require any further information.

Sincerely,

Ali Almansoori
CEO
Tanafos
